Subject: AW: Please know the actual number of agencies work in Germany?

Dear Mr. Burkovic,

in Germany we have around 7.000 agency work companies (companies which are primarily active in the agency work sector) with around 11.300 branches. The BAP alone has 2.000 member companies. According to the statistics of the federal employment agency there are 52.214 businesses (companies and their affiliated companies) with at least one temporary agency worker. So the number of 20 agency work companies is very far from the true situation in Germany.

Number of agency work companies (pdf page 13 78.2 + 77.3):

Number of branches of agency work companies and overall number of businesses with at least one agency worker (excel sheet 5.1):
